(54) AUTOMATIC AUCTION PROCESSING SYSTEM

(57) Abstract:

PURPOSE: To put a contract price in a proper price range as much as possible by suppressing a rise in price by radical bidder.

CONSTITUTION: If the price exceeds a proper price greatly and is not proper in the process of the price rise by a price raising means 50C, an auctioneer judges it and operates a forcible price stopping means 50G at proper time to forcibly stop the price rise in the price rise. Consequently, a forcible stop time purchaser display means 50H displays a purchaser who is stored in a purchaser storage means 50E and sends out a contact signal at the point of time of the forcible stop of the price at the purchaser display part 75 of a display board D. Then when the auctioneer operates a purchaser specifying means 501 and then the purchaser of high sending order displayed at the purchaser display part 75 of the display board D is put in a contacting process.

LEGAL STATUS

[Date of request for examination] 04.04.1996

[Date of sending the examiner's decision of rejection] 30.09.1997

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
